CERTIFICATIONS

CompTIA CSAP (Oct 2025 – Present) **CompTIA CySA+** (Oct 2025 – Present) **CompTIA Security+** (Feb 2025 – Present)
ISC2 CC (July 2025 – Present) **Google Cybersecurity Specialization** (Dec 2024)

SKILLS

Technical Skills: Splunk, ELK Stack, Wazuh, OPNsense, Wireshark, Suricata, Zeek, Snort, Nmap, PCAP analysis, Sysmon, Windows Event Viewer, YARA, Metasploit, MQTT

Concepts & Frameworks: Incident Response, Threat Hunting, Log Analysis, NIST, MITRE ATT&CK, IoT Security, Vulnerability Scanning, OSINT

Scripting & OS: Python, SQL, Tableau, Linux, Windows, macOS

PROFESSIONAL EXPERIENCE

Extern

Security Engineer Extern, Hydroficient

Remote

February 2026 – April 2026

- Hardened an MQTT sensor pipeline with mTLS, HMAC-SHA256, and session-aware replay protection; live attack simulation resulted in zero successful breaches with only +3.9 ms connection overhead
- Built real-time SOC dashboard (WebSocket, Python, JS) displaying zone telemetry, attack blocks, AI anomaly flags, and threshold alerts in a single pane of glass
- Integrated AI anomaly detection through Isolation Forest to flag subtle sensor drift and flow anomalies that evade rule-based checks; model achieved Precision 0.969, Recall 0.620, F1 0.756

Société Générale

Investment Banking Analyst, Energy Coverage

Houston, TX

July 2023 – March 2024

- Operated in a high-pressure, 80+ hour/week environment delivering critical risk analyses under tight deadlines and strict regulatory standards – analytical rigor and precision developed here now applied to threat triage and security operations

PROJECTS

Home Network Security Lab – Enterprise-Grade Segmentation & SIEM

September 2025 – Present

- Built a zero-trust OPNsense firewall with six segmented VLANs, 40+ ordered firewall rules, and hardened DNS via Unbound, DNSSEC, and DNS-over-TLS
- Deployed Suricata IDS/IPS, Zenarmor L7 inspection, and NetFlow/IPFIX telemetry across key interfaces; integrated 30+ threat-intel feeds into dynamic firewall aliases and forwarded all alerts into Wazuh/ELK
- Deployed dual WireGuard VPN tunnels (split-tunnel admin, full-tunnel home); automated maintenance via cron and documented the environment through runbooks, VLAN diagrams, and firewall matrices
- Extending the environment with Oracle Cloud-hosted SIEM integration for long-term log retention, cloud-based alerting, and cross-environment SOC visibility

Cyber Defense & Detection Engineering Lab

April 2025 – Present

- Engineered an ELK Stack SIEM ingesting endpoint and network telemetry; built KQL detection logic for brute-force, lateral movement, and anomalous SSH activity; **automated incident response** by integrating Kibana alerts with a custom Python Flask webhook to trigger real-time UFW firewall blocks
- Investigated simulated incidents using logs and PCAP analysis (Wireshark, Suricata) with threat intelligence enrichment; conducted MITRE ATT&CK-mapped threat hunts to surface suspicious behavior and develop new detection rules

DoD Cyber Sentinel Skills Challenge (National CTF)

June 2025

Department of Defense / Correlation One | 2,600+ participants **(Top 5%, Rank: 119)**

- Solved challenges across OSINT, network forensics, web security, reverse engineering, and malware analysis in an 8-hour national competition using Wireshark, CyberChef, Burp Suite, and related Kali Linux tools

EDUCATION

University of Houston – C.T. Bauer College of Business

Bachelor of Business Administration in Finance (Minors: Accounting, Philosophy)

Houston, TX

July 2023
